

## Assignment No. 13

Create a table product as below:

type	name	cost
FUR	Chair	1500
FUR	Cupboard	15000
ELE	Mobile	25000
FUR	Table	6500
ELE	Television	18500
STA	Notebook	45
STA	Stapler	40

Create following triggers:

1. If the data entry has made for a negative cost then make it positive and insert it.
2. Make a backup of the data every time user enters new information in the table.
3. Create a log file when user makes the changes in the cost of the product, record it.
4. After deleting any entry from table, create a variable that contains the type of product which has recently deleted.
